3.0 Heating Issues.......................................................................................... 4
Appendix A Employee Safety Checklist.................................................. 5
Appendix B Acknowledgement Form......................................................... 6
Appendix C Operations Safety Checklist.................................................. 7
1.0 Policy Statement

Portable electric space heaters, when used properly, can provide an additional degree of comfort over and above a facility's heating system. Unfortunately, with the use of these heaters comes the increased risk of fire and potential injury. Usage without approval through facilities could prevent an unidentified issue within the heating system from being properly repaired. Therefore, it is necessary to establish and maintain strict guidelines for the use of such appliances.

1.1 Purpose and Scope

This Safe Operating Procedure provides University of New Haven staff and faculty guidance for the use and prohibition of portable electric space heaters in campus facilities.

1.2 Review

The Associate Vice President of Public Safety will review and update this policy whenever necessary or at least annually.

All the elements of this policy are considered University of New Haven policy and may be enforced as such. Failure on the part of the employees to follow the policies and safety requirements of this plan may result in disciplinary action.

2.0 Approval Process for Portable Heater Usage

The usage of portable electric space heaters should be avoided with proper temperature control through facility management. However, if required, portable electric space heaters shall only be permitted for temporary use and only after the following conditions are met. Currently, the only approved type of portable heater is a maximum 1500 watt, oil filled radiator style heater identified as UL or ETL approved.

2.1 Identification of Heating Issue to Facilities

Identification of temperature problems is a necessary step to remediating heating system issues. Prior to usage of any portable electric heaters, Facilities must be contacted to assess and attempt to repair any heating issues identified within the workspace. Methods of contact may be accomplished through any of the following:

A. Contact request Facilities Operation Center via phone at 203-932-7087.
B. Request submittal via the Facilities website at www.newhaven.edu/about/departments/office-facilities/
2.2 Approved Usage

Portable heaters approved for usage are provided by the Facilities Operations department. Portable heaters, other than those provided by the Facilities Operations department, are prohibited. After the Facilities department has been notified, any required maintenance on the heating system has been performed, and the Facilities department deems that the use of a portable electric heater meets the written requirements in Appendix C, a portable electric heater will be provided for use. The following procedures must be adhered to when using an electric heater for supplemental heat:

1. Portable electric space heaters shall be plugged directly into an electrical outlet. The use of any extension cord is strictly prohibited.
2. Portable electric space heaters shall be turned off and unplugged when not in use, and at the end of each business day.
3. Portable electric space heaters shall be inspected frequently. They shall be inspected on a weekly basis at a minimum, preferably daily, by the user to insure that they are in good working condition. (Please see Appendix A)
4. Portable electric space heaters shall be placed a minimum of three (3) feet from any combustible material (e.g. curtains, paper, cloth, etc.) and in a well-ventilated area.
5. To avoid potential burns, portable electric space heaters should to allowed to cool prior to moving.
6. Any portable electric space heater found to be in poor operating condition, damaged, or used improperly, shall be turned off, unplugged and reported to the Facilities Department for repair or replacement.

2.3 Prohibited Usage

Usage is completely prohibited if prior approval has not been sought through Facilities Operation Center and heating issues are identified for repair. In addition to notification, the following actions are also prohibited:

1. The use of any portable heater that is fueled by kerosene or that produces open flame is strictly prohibited.
2. The use of any portable heater for permanent heating is strictly prohibited.
3. Portable electric space heaters shall not be placed underneath desks, in any means of egress (exit path), or any high traffic area.
4. The use of portable electric space heaters in laboratory spaces, or, in any area where flammable liquids and gases are being used or stored is strictly prohibited.
3.0 Heating Issues

Portable electric space heaters are not intended for use as permanent heating appliances. Approved portable electric space heaters are only intended to temporarily supplement an office/residential area's heating needs until a permanent solution can be found to correct the area's heating problem, or as an authorized emergency use measure when a building's normal heating system fails. Employees experiencing significant heating problems should call Facilities Operation Center (203-932-7087) to report the problem.
Appendix A

PORTABLE ELECTRIC SPACE HEATER

EMPLOYEE SAFETY CHECKLIST

Employees utilizing a University owned portable electric space heater shall physically inspect it and its work location on a daily basis for compliance with the UNH Policy and Procedures Regarding the Use of Portable Electric Space Heaters. Any space heater found to be in non-compliance with University policy and procedures shall be made compliant for location or if damaged, immediately removed from service.

To assist you with compliance, the following safety checklist is provided:

All checklist questions must have a "Yes" answer for compliance with the UNH Policy and Procedures Regarding the Use of Portable Electric Space Heaters. A "No" answer to any of the following questions shall require the space heater to be immediately relocated for location compliance, or removed from service for its repair or replacement.

<table>

PORTABLE ELECTRIC SPACE HEATER

ACKNOWLEDGEMENT FORM

I hereby attest that I have read, reviewed, and fully understand the University of New Haven Policy and Procedures Regarding the Use of Portable Electric Space Heaters and its attached Portable Electric Space Heater Safety Checklist. I further agree to comply with all parts and aspects of said policy and procedures.

Location of heater acknowledgement:
