Program Overview

Accounting is considered the language of business. Accountants identify, record, and communicate the financial results of a company to investors, managers, and other interested parties. Whether you're planning a career in Accounting or aspiring to be an entrepreneur, you will need to know the principles of accounting and the role of accounting information in decision making.

You will have the opportunity to develop accounting records for Cupcake Haven from the inception of the bake shop to the end of the period when we close the books. As you operate Cupcake Haven, you'll begin to understand and apply financial terms and use generally accepted accounting principles to properly account for individual business transactions, including journalizing, posting, and balancing accounts. You will be able to prepare Cupcake Haven's financial statements such as the Income Statement, the Statement of Retained Earnings, the Balance Sheet and the Statement of Cash Flows. Finally, you will be able to analyze and interpret the financial statements of Cupcake Haven and make decisions about its performance and the future of Cupcake Haven.

Cupcake Haven makes complex financial accounting as sweet and simple as running a cupcake sweet shop. Learning Accounting is a piece of cake!

Participants who successfully complete [Principles of Financial Accounting](#) will earn three college credits.
