Degree Options and Dual Degree Programs

B.S. in Exercise Science and Master of Public Health (MPH)
Gain scientific knowledge in human anatomy, physiology, physics, nutrition, psychology, and human behavior. Additionally, students will gain practical skills in exercise, fitness, wellness, and clinical areas designed to prepare them to be competitive in the 21st century healthcare workforce. Pursuing a Master of Public Health will teach you to help individuals and the larger community by helping them understand the importance, safety, and needs of wellness, exercise, and fitness.

Minor in Nutrition
The minor in nutrition is highly desirable in today’s health-conscious marketplace and offers an opportunity for students to study personal nutrition, healthy eating for disease prevention or sports performance, food science, or cultural cuisine while strengthening their food preparation skills in the food laboratory.
A total of 19-20 credits of nutrition and related course work must be earned by a student to declare a minor in nutrition. This minor course of study has been approved by the Connecticut Division of Higher Education.

B.S. in Exercise Science/Occupational Therapy Doctorate (3+3)
(Coming Soon)
Our Exercise Science degree is a great preparation for our Occupational Therapy program. This combined program will offer students the opportunity to complete both degrees in six years. Students with strong academic records may be directly admitted into this selective program in their first year and must maintain high academic standards to complete the program.

About Us
The University of New Haven, founded on the Yale campus in 1920, is a private, coeducational university situated on the coast of southern New England. It’s a diverse and vibrant community of more than 7,000 students with campuses across the country and around the world.

Within our colleges and schools, students immerse themselves in a transformative, career-focused education across the liberal arts and sciences, fine arts, business, healthcare and health sciences, engineering, public safety, and public service. More than 100 academic programs are offered, all grounded in a long-standing commitment to collaborative, interdisciplinary, project-based learning.

Program Description
The University of New Haven’s B.S. in Exercise Science provides students with hands-on learning experiences that prepare them to become industry leaders in fitness and athletics. Students develop expertise in the exercise science field’s most advanced technology through practical experiences in our state-of-the-art recreational, athletics, and classroom facilities. Our curriculum prepares students for national certifications and enables them to gain experience during their time as undergraduates, giving them an edge when they enter the job market.

Why Exercise Science?
If you enjoy studying the effects of exercise on the human body and using your knowledge to promote health and wellness, and athletic performance, this major may be ideal for you. This program will prepare you for careers in the medical and health science fields, sports performance, and corporate wellness or health coaching.
Many students also continue on to graduate school in various healthcare-related fields such as:
- Physical Therapy
- Allopathic or osteopathic medicine
- Athletic training
- Chiropractic medicine
- Exercise physiology
- Occupational therapy
- Physician assistant

BACHELOR OF SCIENCE
EXERCISE SCIENCE

Did you know?
EMPLOYMENT DEMAND:
Expected to grow by more than 13% by 2026
EMPLOYMENT SETTINGS:
Recreation centers, gyms, schools, collegiate and professional sport teams corporate wellness programs, cardiac rehabilitation, research, academia, and human performance labs
AVERAGE SALARY:
$64,000 per year

Exercise Science at the University of New Haven

The Bachelor of Science in Exercise Science program provides a strong science background that includes coursework in anatomy, exercise physiology, and biomechanics. In addition, students will gain broad interdisciplinary understanding of our healthcare system through the School of Health Sciences core curriculum. Other major requirements offer insight into nutrition, business, and other facets of exercise science while allowing you to apply that knowledge in practical experiences working with clients, students, and others.

Our Exercise Science major will provide you with the knowledge and skills necessary to work as a health and fitness professional. You will learn how to:

- Evaluate health behaviors and risk factors
- Conduct fitness assessments
- Develop and implement safe and effective exercise prescriptions
- Learn and use motivational strategies to guide people in behavior change
- Acquire valuable marketing and communication skills specific to health and wellness

Curriculum

Students will take a wide range of courses to prepare them to work in the healthcare, fitness, sports performance, and wellness industries. The School of Health Sciences core curriculum provides students with a broad, interdisciplinary understanding of how optimizing health, prescriptive exercise, healthcare policy and management, and person-centered care impact the wellness and healthcare profession.

In their sophomore year, students begin taking courses to prepare for national certifications in individualized and group fitness instruction as well as courses in exercise physiology.

In their junior year, students will begin internship preparation, including experiences of hands-on-training in settings both on and off-campus.

In their senior year, students complete a capstone project in the exercise science field.

TRACKS

Students may select a more specialized track for their course of study, such as clinical (applied or research), athletic, sport, recreational, corporate, or managerial/policy, or they may pursue advanced degrees in athletic training (AT) or occupational therapy (OT). Pre-AT Pre-PT and or pre-OT tracks may be declared after the first year and are available only to students who maintain a GPA of 3.0 or higher in the program.

FEATURED COURSES

- Introduction to Exercise Science
- Human Anatomy and Physiology
- Emergency Care of Athletic Injuries and Illnesses
- Exercise Science Internship
- Personal Training and Group Exercise
- Exercise Testing, Assessment
- Exercise Physiologist, and Strength and Conditioning
- Biomechanics of Physical Activity
- Exercise Science
- Sport and Physical Activity in Society
- Exercise Science Capstone

Internships and Careers

Students can obtain a wealth of knowledge from books, lectures, and guest speakers, but more complete knowledge can be acquired by having students enter the workforce and assume responsibilities.

Our Exercise Science program takes advantage of our world-class David A. Beckerman Recreation Center and The Peterson Performance Center a 30,000-plus square-foot centerpiece to the athletics at the University of New Haven to offer on-campus internships and practicums for students in this program. Students will have opportunities to teach group exercise, individualized instruction and strength and conditioning in our Recreation and Performance Centers. Students will also be able to get practical experience from local sports medicine facilities, gyms and fitness centers, local high schools, and other fitness and wellness companies.

Exercise science will enable you to work in a variety of health and fitness roles and organizations that include the following:

- High School and Collegiate Sport teams
- Insurance company wellness coach
- Corporate wellness
- Hospital cardiac rehabilitation
- Sports performance
- University recreation facilities
- Fitness centers
- Personal trainer and other entrepreneurial opportunities
