Recent national studies prove students who live in campus housing have higher graduation rates, higher GPAs, and report greater overall satisfaction with their college experience. Our team of residential life professionals and student staff members are devoted to creating a safe, supportive, inclusive, and engaging learning environment in which you will succeed — personally, socially, and academically.

“The University of New Haven campus has really become my home. I love being involved in the small community, and the friends I have made have become my family. There is always something to do on campus, whether it’s participating in RecSports, going to SCOPE events such as movie nights, or going and cheering at all the different sporting events. I have had such a great time living on campus and being in the small school environment. I couldn’t picture my college experience any other way.”

ENHANCED LEARNING COMMUNITIES

Where you live and learn — from exams to Xbox!

At the University of New Haven, we know that not everything you learn will come from your classrooms or even your books. Far from it, in fact. In keeping with the University’s focus on student success, we created many different Enhanced Learning Communities. Not only will your enhanced learning community immerse you in true collaborative learning with a group of your fellow first-year students, but it will also take you beyond the classroom and into the world. Living Learning Communities (LLCs) participate in field trips, guest lectures, and other activities related to their shared interests. In addition to these opportunities, Residential Learning Communities (RLCs) allow students to participate in weekly structured activities and events related to their academic coursework.

LIST OF LLCs

- Having the GLBTQ+ and Allies LLC as an option for first-year housing was really relieving. Starting college is already overwhelming in and of itself, and trying to find a complete stranger you might feel safe living with adds on a whole other level of stress. This LLC took a lot of that weight off my shoulders because I knew the people I lived with all shared common ground with each other. It was easier to talk to everyone and make friends. We also had an amazing RA that made the LLC feel more like a family than a group of stressed college students. It’s how I met a lot of my friends during my first year here.”
